

WEB SUMMIT VANCOUVER 2026 · ALPHA APPLICATION

CITRUS FANTASY SPORTS

Building the world's most accurate Fantasy Hockey Platform

ML-powered fantasy hockey built from 863K real NHL shots across 7 seasons.
31 engineered features · XGBoost v3 + Bayesian Regression · Claude AI (Stormy)

February 2026 | Confidential

THE FOUNDER

01

Professional Hockey Player

Played at the professional level and coached at the elite level. Deep, lived understanding of hockey analytics — what scouts track, what matters on the ice.

02

Chartered Professional Accountant

2.5 years of financial rigour. Understands unit economics, CAC, LTV, and how to build a sustainable business — not just a cool product.

03

Self-Taught Data Scientist

Built the 70.9% R^2 ML engine from scratch. XGBoost v3, Bayesian regression, GAR, GSAX. 95K+ lines of code. No co-founder needed.

THE JOURNEY

2 years building nights and weekends while working full-time as a CPA.

Built the full-stack infrastructure, projection models, and product solo. 95K+ lines of code, 7 ML models, 60+ database tables — every line written by one person with a laptop and a vision.

WHAT IS FANTASY SPORTS?

Season Long Fantasy Leagues vs. Daily Fantasy Leagues

DRAFT

- Create a league with friends or join one publicly
- Draft real NHL players onto your own team
- Pick up, drop, and trade players with your league throughout the season

MATCHUPS

- Compete head-to-head against league mates each week
- Your players earn points based on real NHL performance
- Manage your lineup, make trades, and work the waiver wire

CHAMPIONSHIP

- After the regular season, top teams enter the playoffs
- Custom playoff formats crown a league champion
- Bragging rights, prizes, and a reason to watch every game

Citrus offers completely custom scoring and league styles

Opens the door for ALL users and ALL league types — from casual to hardcore

THE PROBLEM

NHL is the fastest-growing Big 4 sport — and the only one abandoned by major fantasy platforms.

5.8M

Adults playing fantasy hockey at
the end of 2025 - Mordor
Research

No dedicated platform.
Yahoo & ESPN are spread too thin.

Stale, Inaccurate Projections

Yahoo and ESPN use basic averages that haven't evolved in years. No ML, no play coordinate data, no xG. Projections regularly miss by 30-50%.

No Analytics Depth

Advanced metrics like xG, xA, GAR, and GSAx don't exist on any consumer fantasy platform. Serious players have nowhere to go.

High Barrier to Entry

New players feel overwhelmed. Experienced players feel underserved. No AI guidance exists. No platform bridges both worlds.

NHL viewership up 35% since 2020 · 14.6% CAGR — fastest-growing Big 4 · 2026 Winter Olympics (Milan) featuring hockey

THE SOLUTION

One platform. Four pillars. Every advantage.

CORE ENGINE

ML Projections

0.817 AUC-ROC

If you show our model a random goal and a random save, it correctly identifies which is which 81.7% of the time. Born from 8 NHL seasons of data, and 870,000 shots analyzed

LIVE EXPERIENCE

Real-Time Scoring

Live WebSocket scoring that updates every 30 seconds during games. Sub-second response. No refreshing, no waiting.

FAN ENGAGEMENT

Stormy AI

Claude-Powered

Your personal AI General Manager. Ask lineup questions, evaluate trades, get waiver picks — in plain English. Real-time, roster-aware advice.

ANALYTICS LAYER

Advanced Analytics

xG · xA · GAR · GSAX

Professional-grade metrics on a consumer platform for the first time. 7 ML models powering the same data NHL front offices use.

BEST-IN-CLASS PROJECTIONS

Real season data · Citrus vs Yahoo vs ESPN vs Actual

Player	Citrus	Yahoo	ESPN	Actual
Dylan Larkin	26.0	14.7	16.0	24
Emil Heineman	15.8	12.8	11.3	15
Vince Dunn	6.2	5.2	4.6	7
Josh Doan	19.2	13.2	9.6	18

70.9%

Player-Season R²

0.817 AUC-ROC · 0.842 Correlation
591 players validated · 863K shots

THE MOAT

Can't Yahoo or ESPN just copy this? No.

2+ years of domain-specific engineering across 7 NHL seasons and 863K shots. Our v3 model now exceeds MoneyPuck's published AUC-ROC — with a proprietary calibration pipeline and pass context system (AUC 0.961) that no competitor replicates. This isn't a weekend project. It's a moat.

XGBoost v3 on exact play coordinates · Proprietary multi-layer calibration · Bayesian per-game projections · Opponent-aware difficulty rating

A GLOBAL AUDIENCE FOR THE NHL

Hockey fans worldwide follow the NHL — but have zero dedicated fantasy tools.

- ▶ 32% of NHL players born outside North America
- ▶ 20 birth countries on 2025-26 NHL rosters
- ▶ IIHF Worlds: broadcast in 100+ territories
- ▶ 50M+ hockey fans across NA & Europe
- ▶ 84 IIHF member nations — untapped audience
- ▶ Europe fantasy market: \$6.9B, 12.8% CAGR

THE ASK

WEB SUMMIT VANCOUVER 2026

BOOTH CENTERPIECE: LIVE DRAFT EXPERIENCE

Visitors draft a real NHL fantasy team — with Stormy AI as their GM — and compete on a live leaderboard.

1

Sit Down & Pick a Format

Visitor chooses: Quick 3-player draft (2 min) or full 6-player team (5 min). Low barrier, high engagement.

2

Stormy AI as Your GM

Stormy suggests picks using live xG data: "Pastrnak's xG is 0.42 from the slot tonight — he's your best value." Visitor sees the model working in real time.

3

See the Analytics

Each pick shows xG heatmaps, GAR rankings, DDR matchup grades, and finishing talent scores. The full analytics layer, live.

4

Submit & Compete

Drafted team gets scored against real NHL results. Live leaderboard tracks "Best GM at Web Summit" — updated throughout the event.

5

Capture & Share

QR code → waitlist signup + shareable draft card for X/LinkedIn. "I drafted the #1 team at Web Summit." Every visitor = a lead.

WHY CITRUS AT WEB SUMMIT

A game, not a pitch

Visitors play, compete, and experience the product. No passive demos.

Full product on display

Drafting + AI + xG + live scoring all working together, live.

Verifiable depth

95K+ lines. 863K shots. 31 features. 7 models. Not a wrapper.

Founder-market fit

Pro hockey → CPA → self-taught ML. Built every line alone.

Global audience

European NHL fans with no fantasy tools. 100+ broadcast territories.

Ready to launch

iOS App Store launch March 2026.
